

EVANSTON HOSPITAL

EVANSTON, IL

LANDSCAPE ARCHITECTURE

In conjunction with work for North Shore University Healthcare, including landscape architectural services for hospitals and medical offices in and around Chicago's north shore, Teska Associates, Inc. prepared a variety of site and landscape plans for the Evanston hospital campus.

The hospital's location and sensitivity to the adjacent residential areas required a blending of existing landscape treatments and substantial screening for the adjoining neighbors around the campus periphery.

Landscape projects include ornamental plantings at the main entrances to the hospital and New Women's Hospital as well as parking lot plantings at the Kellogg Cancer Care Facility.
