

PRESIDENTS PLAZA ATRIUM PLANTERS | CHICAGO, IL

ARTICLE BY :: JEFF MARTIN

When GlenStar Properties acquired the 810,000 s.f. President's Plaza office complex near O'Hare airport in late 2007, they immediately began improving the common areas of this 20 year old building that is home to many businesses, including the corporate headquarters of True Value.

Recently, Teska Associates assisted GlenStar Properties in redesigning the highly visible atrium planters in the main lobby of each building. Teska worked closely with Moore Landscapes, Inc. who was contracted to install and maintain the design.

According to Gordon Held of Moore Landscapes, Inc. "the installation definitely provided its share of challenges, but once completed we knew that we had brought to life the creative design that Teska had envisioned".

Client: **GlenStar Properties**

ROCK + WATER + EARTH | ENGAGING THE SENSES

"The design developed by Teska and installed by Moore is wonderful. We receive compliments from tenants saying how much they like it almost every day." - Steve Smith of GlenStar

INSTALLATION OF DESIGN

CENTRAL WATER FEATURE LOOKS & SOUNDS ATTRACTIVE

"We felt it was important to engage the senses on multiple levels. Being a very visible space, it was obvious it needed to look attractive, but we also felt it was a great opportunity to make a space that sounded attractive"

- Jeff Martin, Teska Landscape Architect
